About **BAJO**[®]

Established in 1993 by Wojciech Bajor, an architect and scenic designer started BAJO toys as a local family business. Now is an innovative company built on the primary element of the sustainable resources and development. Our factory is located at the foot of the Polish Carpathian Mountains, environment which inspires us to maintain our sustainable solutions. We strongly believe we must always take into consideration any consequences that our actions may have during the toy creation. It applies to all our work, from the birth of our concepts and toy design, ending with the company's waste policy.

The toys we design are a result of our passion and love for their uniqueness and quality. This gift comes from the heart of BAJO. The toys reflect the essence of

childhood. Every single toy is individually made with great care, precision in every detail. Each of these unique items has its own story which is the result of long hours of designing and customizing for children and parent's specific needs.

We give importance to the aesthetics of toys, inspired by a classical trilogy Truth, beauty and goodness. We try to create beautiful objects, valuable not only for their utilitarian character. BAJO toys are created with reference to pedagogical aids used for educational and physical development that are often used in kindergartens. In the same light, BAJO have participated in many educational and developmental projects, which encourage positive social changes and increase the environmental consciousness.

Children make the BAJO toy their own by creating their own rules and ways of playing because they are created to trigger their imagination. We make an effort to design multi-functional toys, which at the same time trains child's intelligence, dexterity and their awareness. Our toys are focused on sustainable development of the various types of the imagination: colouristic, spatial, motor, symbolic and creative. They learn to think analytically or abstractly.

We use the variety of deciduous trees of original graining, we expose its natural colour and we allow it to darken and stain. **We always try to preserve at least one, even if it is only a very small part, to be completely natural. The natural element gives a child the chance to feel the natural warmth of wood.**

In 2013 BAJO launched a new design collective, and called it "TOBE". This project brings to market creatively designed toys from multiple designers.

At about the same time BAJO designed and produced under license a toy collection based on the award-winning children's book written by Julia Donaldson and illustrated by Axel Scheffler : **The Gruffalo.**

Our toys correspond to all EU and US standards and requirements for toys safety (Directive 2009/48/EC and REACH regulations) in terms of materials, manufacture and labelling. We use only the safest certified non-toxic paints based on natural components, which fulfil EU safety standard (EN71) and US norms. We support our community by

using only carefully selected high quality materials from certified local suppliers, who respect European eco-standards of the wood production. Each product is hand-checked to ensure quality of the completed item.

All of our products are manufactured in Poland.

our product

material

We only use carefully selected high quality materials from certified local suppliers, who respect European eco-standards of wood production. Below is our wood selection:

colours

We use only certified non-toxic paints based on natural components, which fulfil EU safety standard (EN71) and US norms. We use wide range of water based paints as well as oil to protect the wood.

packaging

We use screen printed cardboard boxes as well as wooden boxes. And the packaging has often a label presenting the toy.

product guide

Age grading icons: you can find them next to each toy's description.

The toy has a bell.

Toys from recent years.

Toys that has been redesigned.

Difficulty levels of puzzles or games: simple, medium, hard.

ToBe® toys.

Please note that some (not all) of our toys may come in different colours. If you prefer a certain colour, please add the correct suffix to the product code on your order form. Otherwise, we will send you the toy in the colours we have available. For example for a red snail please quote 11510R, if you have no colour preference please quote 11510.

INFANT TOYS

This group of toys, dedicated for children aged 1+ is inspired by the world of animals. Dogs, frogs, ducks, horses or our personal favourite, ladybirds. It meets perfectly the needs resulting from the natural sensitivity of a child to touch and elements around them. Symbolism of wooden shapes of toys directly addresses the child's imagination. It develops language skills and intentional communicating with the environment. We take great care of manufacturing the toys and apply the same emphasis to quality to guarantee safety. This has been confirmed with European Regulations by TUV Rheinland and SGS.

Sortroller
natural
22 x 16 x 18 cm

The Sortroller consist of two parts: the body of the snail (wheeled base) and its shell (cylinder shaped). Pull the Snail's body and watch its shell roll. Take the shell off and use it as a sorter. It has 6 different shapes to shove the wooden shapes through. This helps the child to distinguish between shapes and enhances their dexterity. You might even find the little one using it as a rattle while shaking the shell full of colorful shapes.

VEHICLES

There is wide variety of toys which introduce topics of common traffic, speed and mobility in the world of play. Stylised, colourful, in various shapes and sizes, these cars are not intended to merely imitate cars from the world of adults. They refer rather to the child's imagination and develop spatial orientation, the sense of direction and distance. The collection of large and small, very colourful vehicles, includes:

- Trucks and Tractors, which may be loaded and unloaded who use different items to transport different items.
- Emergency vehicles: ambulance, police, fire brigade and road inspection.
- Passenger vehicles: buses, passenger cars of various types and makes
- Aircrafts and helicopters, which travel along with the child.

Be wowed by the movement of this train. When the wheels go round the train comes to life. Pull it forward and watch the trains engine move independently from its driver cabin. At the same time its cargo turns around making the bell inside jingle.

45310
 Train to build
 53 x 9 x 8 cm

Trains consist of many interchangeable elements, each different in colour and shape. Children can create their own unique combinations by stacking cargo pieces on wheeled trailers in many ways. Play develops imagination and creativeness.

*Colours will be selected according to availability unless otherwise stated when ordering.

EDUCATION

BAJO's toys develop together with every child. Its educational element starts with its basic principle but as the child's abilities grow so does the full potential of BAJO toys reveal itself. These educational wooden toys introduce the basic building blocks of learning while playing:

- Experiencing shapes, proportions and colours: recognising, classifying and associating.
- Developing manual skills: self-reliance, concentration, resourcefulness.
- Discovering the relationships between shapes, colours, sizes: drawing, discovering rules.

GAMES & PUZZLES

We have developed a graphic style to trigger the imagination of every child and we have made games and puzzles to challenge the child's skills while they learn and have fun.

We create these toys thinking about how decorative they can be, so the natural material and the colors on it make together a good looking object to have in every child's room.

A crowd, skyscrapers, a city and tropical animals all in a puzzle format ignite different elements of a child's character in the puzzle: surprise, humor and suspense.

ROLE PLAYING

Acting as mom and dad it's the oldest game in the world. Children have always been fond of dolls, building houses, working in carpentry, workshops, transporting various goods, teaching at school and galloping on horseback. We have developed these ideas to be with them in their adventures when they picture themselves being grown ups in the future.

DECORATION & INTERIORS

We have proposed various items that liven up a child's bedroom taken from their imaginative world. It consists of a wooden stork with the first 3 colours seen by babies. It's beautifully suspended with its wings outstretched. Also, colourful mobiles, wall decorations all with various figures in shapes of a ballet dancer, clown and bouncing puppets.
