ISSUE 01032025

history & idea

Bajo has been present for 30 years. It was established in a tiny village of Kamionna, at the foot of the mountain bearing the same name. We started the company at the break of 90's, in time of historical change of political system. Back then, the free market in Poland was virtually non-existent. We created toys for consumers yet to be. Interest in our products was growing along with Bajo's development.

The situation in which we began our work forever determined how we run the company. We seek inspiration in a tension between the conservative world of childhood and wood and contemporary pace of life, technology advancements, virtual reality, overconsumption and flood of information, ecological issues and intensity of social change.

What we offer to parents, grandparents and most of all to children is becoming a master of fun and game. The real fun is based on creating new ways of

communication, using symbols, the infinite possibility of new worlds. Every child who is having fun is an artist. There is an immense potential hidden in the act of playing and it pays off later throughout life. We intend to serve the art of playing. This is why we create toys.

ecology

We use renewable, easy to recycle material, which is wood of deciduous trees. It comes from places with sustainable forestry. We also source valuable detritus from furniture and parquet manufacturers. Furthermore, we apply cardboard, wool felt and cotton.

However, material doesn't quite define our approach to ecology related problems. The starting point here is design and production process. The main objective is to make solid, lasting things. We know for a fact that the second generation plays with the same Bajo toys. We replace missing pieces, fix our toys and keep in touch with our costumers. Timeless design gives new life to Bajo toys and sometimes they become home decorative elements, childhood memorabilia. In the production process we have increased the renewable energy sources. Factory roof is covered with solar panels. Good proof of coexistence with surrounding nature is the fact that deer raise little ones in the woods

around the factory, birds build nests inside our facility. We basically eliminated plastic in the packaging and transport stages.

Wooden toys communicate core ecological ideas. Contact with wood, its friendly warmth, possibility to build a whole universe from simple elements and a message that it carries - we believe these are crucial steps in forming environmental consciousness. One may say that wooden toys convey the love for nature in a perfect way.

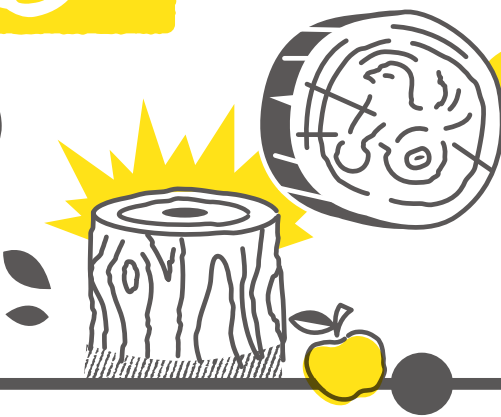

30 years of BAJO®

1989

Poland was going through many changes after overcoming communism. The result of the elections of 1989 was a joyful moment and it opened new possibilities. In spite of that, the lack of work and the distrust of a new economic system, aroused understandable fear in local communities.

The farmers were cutting down massive old orchards, and amazing wood from fruit trees was available for essentially pocket change. So, as the designers we were, we felt compelled to reveal the unique beauty of this material, using it as a source of inspiration for our designs.

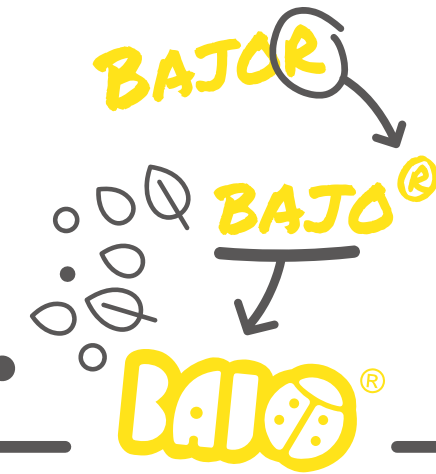

1993

In the neighboring markets there was an increasing interest in wooden toys and our designs were received very positively. However, no one in the area wanted to implement our ideas or manufacture the toys.

This is how Bajo was born!

Back in those days there were no experts in toy manufacturing, so we decided to break down all the necessary tasks into small, simple steps that could easily be performed by almost anyone. The lack of space and machinery prompted us to rent an old carpentry (1993) that we eventually bought and renovated.

We named the company after our family name "Bajor". However, we decided to use the "registered trademark symbol" as the last letter of the name.

1994

Time to reach our clients! After many unsuccessful attempts to find a seller for our toys, we decided to open in Kraków the first Polish-made wooden toys store in the country (spring 1994). This allowed us to establish contacts with foreign clients. At this point the Polish market practically did not exist.

In the fall of 1994 we took part in an exhibition in Poznań, where we won a medal for a set of wooden cars.

In 1995 we took part in Nuremberg's Toy Fair for the first time. The quality and technology of the participants were sky-high, we could only compete with our originality and the unique beauty of our wood. After years of hard work, we won the German Design Award (Deutscher Designpreis, 2002).

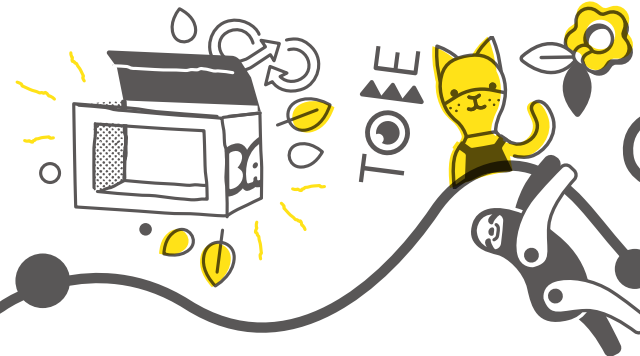

2004

In 2004 Poland joined the EU. That helped to break down the distrust usually associated with brands coming from Eastern Europe. In places like North America, Japan, or Australia, Bajo Toys started to be perceived as fully European.

During the following decade our company grew slowly but surely. New contacts, customers, distributors, and agents jumped aboard and joined our dream.

In 2010 we took part in the Bambini European design program. We expanded the factory acquiring new skills and technologies.

Packaging made from raw cardboard and printed with a single color was at that point an eco-trend yet to come. Many customers found it difficult to accept that our products didn't come inside the same shiny, colorful boxes other brands were using. Time proved us right, the simplicity of our boxes started to stand out and became one of our brand's characteristics.

2013

In 2013, we created the brand TOBE. A new generation of designers entered the company, and with them new styles, new materials and experimentation.

Today

We currently collaborate with many companies around the world for which we create unique products. We try to respond to the challenges of the present day through our work and toys.

We believe that in a world with an uncertain future, a seemingly trivial toy can be a source of hope and a sign of solidarity. We act because a child's play is a form of resistance.

solidarity

Bajo emerged shortly after the great social victory of Solidarity movement. The victory instantly became a giant, systemic transition challenge. In our small village, as elsewhere in Poland, there was a lack of capital, tools, technology and experience to handle the new economic order. Idea of Solidarity gave us the concept to start production of wooden items made by elderly and disabled individuals, in such a way that did not require specialized skills. There was an abundance of wood from old orchards, which were cut down in bulk. Finally, we, the founders, added in our professional skills. We are master designers and academic teachers at Cracow's Polytechnic, department of architecture. And this is how designing, producing and selling toys began.

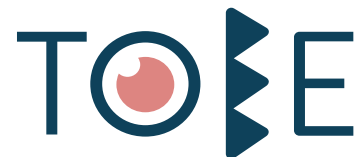

Nowadays, our company employs also people who find it difficult to compete for work. Our pedagogical proficiency allows us to educate youth from surrounding villages and vocational schools as well as Academy of Fine Arts students. We have taken part in numerous local and European educational, prosocial programs. We are partners with therapeutic and juvenile centers. The toys we make carry a notion of solidarity in themselves. In the design process, we always focus on the possibilities of reaching out to new

people. The ultimate goal is to provide education and blissful childhood through the toys we create. They have the power to inspire actions that lead to climate crisis prevention, better understanding and acceptance of social diversity.

In 2013 BAJO launched a new design collective, and called it "TOBE". This project brings to market creatively designed toys from multiple designers.

At about the same time BAJO designed and produced under license a toy collection based on the award-winning children's book written by Julia Donaldson and illustrated by Axel Scheffler: **The Gruffalo**.

materials

We use carefully selected high quality materials from certified local suppliers, who respect European eco-standards of wood production.

packaging

We are doing our best to eliminate all the plastic from our packaging. That's why we screen-print the majority of our packaging and use paper tape to close the boxes. Our box fillers are made of leftover cardboard. We still look for new, better solutions to be planet-friendly.

colors

We use only certified non-toxic paints based on natural components, which fulfill EU safety standards (EN71) and US norms. We use a wide range of water-based paints as well as oil to protect the wood.

quality

Our toys correspond to all EU and US standards and requirements for toy safety (Directive 2009/48/EC and REACH regulations) in terms of materials, manufacture and labeling. We support our community by using only carefully selected high-quality materials from certified local suppliers, who respect European eco-standards of wood production. Each product is hand-checked to ensure the quality of the completed item.

All of our products are manufactured in Poland.

ordering guide

Recommended age grading: you can find the icons next to each toy's description

Choking hazard, unsuitable for children under 3 years old

The toy has a bell

News from recent years

Toys that has been recently redesigned

Difficulty levels of puzzles or games: simple, medium, hard

25 x 12 x 2,5 cm Toy size (rounded up)

25 x 12 x 2,5 cm Box size

ToBe® toys

Please note that some of our toys may come in different colours. If you prefer a certain colour, please add the correct suffix to the product code on your order form. Otherwise, we will send you the toy in the colours we have available. For example for a red snail please quote 1151OR, if you have no colour preference please quote 11510.

Rattles, chewing toys, simple shapes, raw material, touch, colour, sound, movement. These initial toys have a double role to play. They link toddlers with the world. Thus beginning fascinating contact with reality and amazing realization of one's existence. Simultaneously, first games such as touching, pushing, chewing are wonderful forms of communication with observant parents. It is a special kind of closeness. We take great care of manufacturing the toys and apply the same emphasis to quality to guarantee safety. This has been confirmed with European Regulations by TÜV Rheinland and SGS.

WHY IS HEMP THE BEST?

Hempions are **ANTIBACTERIAL** and **ANTIFUNGAL** by nature!

Washing and use only make them softer ✦✦✦ They're safe and hypo-allergenic!

Hempions' textile dries faster than cotton

and it's also 3 times stronger

Hemp needs **4 TIMES LESS WATER** than cotton

Hemp plant is a relative of cannabis but it's **NOT** a drug and it's completely safe.

(THC)
(it contains less than 0,2% of THC)

Hemp doesn't need pesticides nor herbicides while growing. It naturally repels bugs and microbes.

It fertilizes the soil, helping it regenerate after other crops.

It can absorb large amounts of CO₂, improving the air quality on Earth.

A hemp plantation produces more O₂ than some forests.

HEMP HAS MORE THAN 50,000 USES!
(and doesn't waste a thing).

TREAT IT WITH CARE

The textile and the wood of this toy need different cleaning and care. The wooden part shouldn't be exposed to humidity and should be cleaned with a damp cloth. Wash the textile in cold or slightly warm water with little soap. Ironing is best while it's still little damp.

Children form the primary human community. They still prefer riding horses, steam locomotives and building feudal castles. In every generation childhood repeats the immemorial cycle using the same toy kit. Classic toys deserve their noble name. They are classic for at least two reasons: 1) they possess everlasting patterns 2) their form has been perpetually perfected. As such they are one of a kind.

Sortroller

↗ 20,5 x 15 x 17,5 cm

📦 22 x 16 x 18 cm

37840

natural

37830B

green & blue

The Sortroller consist of two parts: the body of the snail (the wheeled base) and its shell (the cylinder). Pull the Snail's body and watch its shell roll. Take the shell off and use it as a sorter. It has 6 different holes to shove the wooden shapes through. This helps the child distinguish between shapes and enhances their dexterity. You might even find the little ones using it as a rattle while shaking the shell full of colourful shapes.

Acting like mom or dad it's the oldest game in the world. Children have always been fond of dolls, building houses, working in carpentry, workshops, transporting various goods, teaching at school and galloping on horseback. We have developed these ideas to be with them in their adventures, when they picture themselves being grown-ups in the future.

The Hempions by TOBE

HEMP IS ECOLOGICAL

Because of our commitment with the environment we decided to make this wonderful collection. The Hempions are made with love and are eco-friendly, their texture and their quality turn them into a pleasure to play with. Here are some of the reasons why we use hemp instead of cotton or any other textiles.

Hemp is a relative of cannabis but it is NOT a drug!

THC

(it contains less than 0,2% of THC)

It uses **4 TIMES LESS WATER** than cotton

and half of the land than cotton needs.

Hemp doesn't need pesticides nor herbicides while growing. It naturally repels bugs and microbes.

It fertilizes the soil, helping it regenerate after other crops.

It can absorb large amounts of CO², improving the air quality on Earth.

A hemp plantation produces more O² than some forests.

Hempions are **ANTIBACTERIAL** and **ANTIFUNGAL** by nature!

Washing and use only makes them softer

They're safe and hypo-allergenic!

Hempions' textile dries faster than cotton

It's also 3 times stronger

The animal kingdom is wild and diverse. For us, it doesn't only include the ones near us like farm animals and pets, but also exotic beasts and dinosaurs, the ancient inhabitants of our planet. It also contains mythological creatures and fantastic animals.

Animals are inevitably present in childhood and kids create a symbolic connection with them. Wolves and hares, bears and foxes, donkeys and monkeys, become some of the main characters in children's imagination, after all, animals and kids share the world of childhood. The babies of animals have the same need to play as human children.

Dachshund

18m+

Grasshopper

17 x 8 x 7,5
18,4 x 9,5 x 9,8 cm
26020

Our pull-back bugs have always been a favorite. That's why now we've created an XXL version of the ladybird and grasshopper, designed specifically for younger children under 3 years old. These larger versions function in the same way as the original, but instead of the pull-back mechanism, children use their own hands to set them in motion.

Simply give the ladybird or grasshopper a gentle push, and watch it zoom along! This version is a perfect introduction to cause-and-effect play, helping to develop fine motor skills and hand-eye coordination.

NEW!

Rocking Kangaroo

↗ 18 x 5 x 13 cm
23630

The Kangaroo is a fresh take on the classic rocking toy. Designed to embody the energy and agility of this iconic marsupial, its sleek form mirrors the natural movement of a real kangaroo in motion. The earthy, transparent colors enhance the wood's natural beauty while evoking the warm hues of the kangaroo's native habitat.

Adding a playful nod to its origins, the rocking element takes the shape of a boomerang —an homage to one of Australia's most recognized cultural symbols. Give it a gentle push, and watch as it bounces to life, just like a real kangaroo in the wild.

From the unique swimming iguanas to crabs, to crawling sea lions and of course, the iconic galapagos tortoise, we have chosen to represent some of the most famous inhabitants of this archipelago.

We are celebrating our first 30 years!

Bajo is turning 30 and we wanted to celebrate this milestone by bringing back some of Bajo's early designs. Throughout our history as toymakers, we have learnt and changed so much and we thought how interesting it would be to apply all this acquired knowledge into some of the pieces that our journey was built upon.

There is a wide variety of toys that introduce topics of street traffic, speed, and mobility to the world of play. Stylized, colourful, and diverse, these cars are not intended to merely imitate cars from the world of adults, they refer rather to the child's imagination and develop spatial orientation, the sense of direction and distance.

The collection of colourful large and small vehicles includes:

- Trucks that can be loaded and unloaded.
- Emergency vehicles: ambulance, police, fire brigade and road inspection.
- Passenger vehicles: buses, cars of various types.
- Aircrafts and helicopters, which travel along with the child.

“Make It!” is our latest toy collection, inspired by the DIY (Do It Yourself) philosophy. With these kits, both children and adults can embark on the exciting journey of crafting their very own toys from start to finish, allowing for endless opportunities to personalize and paint them as they see fit.

The “Tractor” kit consists of 25 intricately designed pieces and includes a comprehensive step-by-step instruction manual that guides the assembly of this engaging toy. Children will not only be consumers but creators, enjoying the hands-on experience of sorting, sanding, assembling, and bonding the components together. This unique item serves not only as a source of entertainment but also fosters a deep sense of accomplishment, strengthening the bond between the child and their handcrafted toy.

The tractor can be painted and decorated!

The container of the cargo truck has a removable top. When installed, it serves as a sorter for three colourful blocks.

*Colours will be selected according to availability unless otherwise stated when ordering.

BAJO's toys develop together with every child. The educational element starts with a basic principle but as the child's abilities grow so does the potential of BAJO toys. These educational wooden toys are built upon the ideas of learning while playing:

- Experiencing shapes, proportions and colours by recognizing, classifying and associating.
- Developing manual skills, self-reliance, concentration and resourcefulness.
- Discovering the relationships between shapes, colour, size and patterns.

Rocket

7 elements

9,5 x 9,5 x 20 cm

10 x 10 x 20,3 cm

38890

This pyramid is based on the idea of contrast among colours, therefore is not sorted from the brightest to darkest, instead, its colourful rings are intercalated.

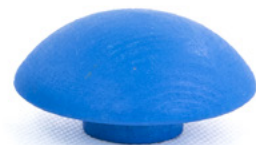

Alien Saucer Stacker

- 4 elements
- 10 x 10 x 14,7 cm
- 16,5 x 15,5 x 7,2 cm
- 38880

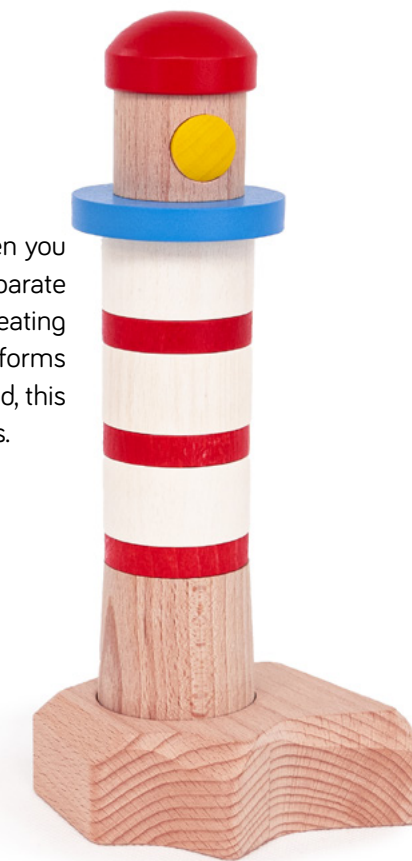

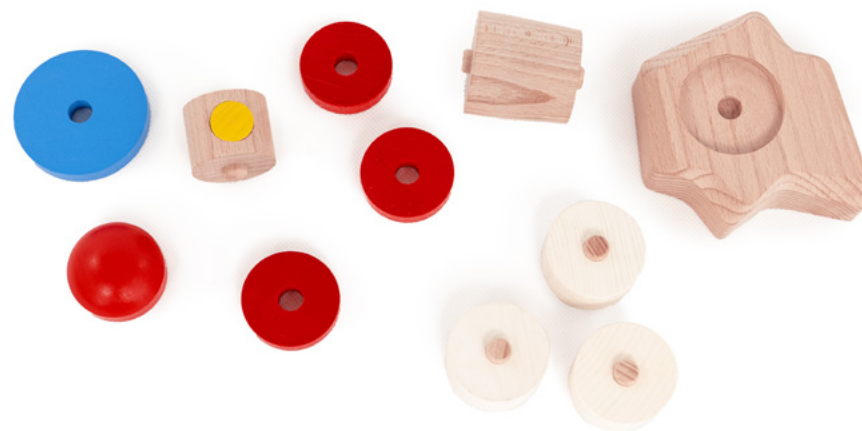

We have made a pyramid in the shape of an alien saucer, honoring this everlasting curiosity of humans with the unknown. We don't want to be lonely in the universe and we decided to make the friendliest of aliens to play with and decorate the child's room. Simple design, metallic paint and attention-to-detail production turns this toy into an instant must-have. The ship has 4 parts and is compatible with our rocket pyramid.

Lighthouse pyramide

- 11 elements
- 12,7 x 10,3 x 25 cm
- 13 x 10,8 x 10,2 cm
- 33460

You can almost hear the sound of waves against the rocks when you gaze at this lighthouse toy. This toy is constructed from 11 separate pieces, and they can all be stacked in various orders, creating different combinations. Once playtime is over, this toy transforms into a charming decorative piece. Crafted from solid beech wood, this lighthouse features carefully painted parts in vibrant navy colors.

Fishing boat

- 10,4 x 6,7 x 5,3 cm
- 11,5 x 6 x 6,2 cm

- 47050B*
blue
- 47050W*
white
- 47050R*
red

These boats are beautifully designed, pocket sized and come in three colors: red, white and blue.

Although it is a wooden toy, it can be put in water for short periods of time. It is just important to dry it out after every use and coat it in vegetable oil to keep the pores of the material ready to keep sailing.

*Colours will be selected according to availability unless otherwise stated when ordering.

39320

Every day we interact with physical forces that we can't see directly with our eyes, but have a profound effect on our world. One of those forces is magnetism, a phenomenon equally useful and entertaining. These qualities motivated us to design the N-S Pyramid, a toy that allows children to safely explore the powers of magnets and gives them the opportunity to discover not only the principles behind this force of nature, but also develop an appreciation of shapes, patterns and colors.

This set of 10 interlocking balls are great for teaching colours and numbers. A special wooden board with pegs and holes enables children to use this toy as a regular stacker and a board to create patterns.

NEW!

12m+

0+5 Flip

24 x 7,8 x 17,5 cm
27,5 x 8,5 x 17,5 cm
34460

This toy helps children gradually grasp the concepts of numbers and counting in a fun, hands-on way.

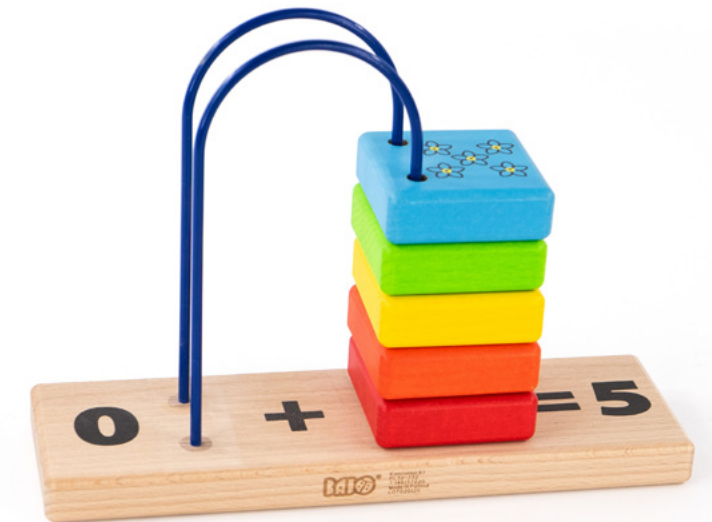

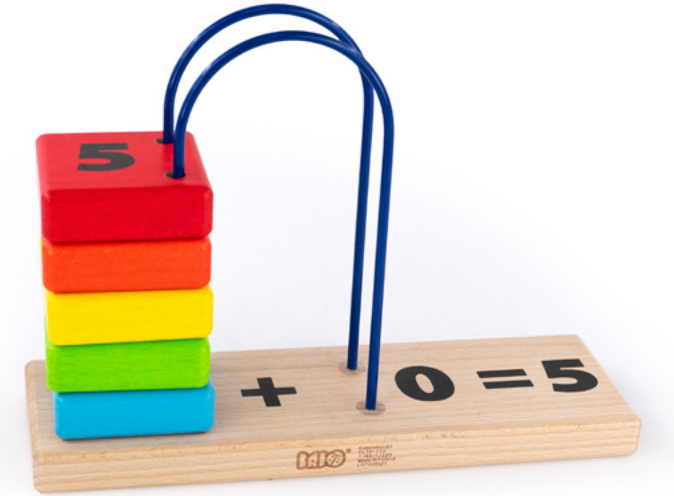

Step 1: Children first explore the five colorful blocks, engaging their senses by feeling the shapes, flipping the blocks in a book-like motion, and observing the vibrant colors.

Step 2: Next, they begin to understand the concept of quantity with illustrations of 1 strawberry, 2 oranges, 3 bees, 4 trees, and 5 flowers, each corresponding to the numbers on the blocks as well as the concept of zero.

Step 3: As they play, children naturally start to associate the numbers with the objects on the blocks, reinforcing their understanding of counting and number recognition.

Step 4: Finally, they can experiment with basic arithmetic, following the prompts on the base to explore simple addition problems that add up to five.

This gradual, multi-step learning process makes the toy an engaging and effective tool for building early math and problem-solving skills.

Deep and Shallow Sorter

base and 3 cylinders

16 x 6,5 x 6,5 cm

22 x 7 x 7 cm

B2040

Inspired by Montessori principles, the Deep and Shallow Sorter is a thoughtfully designed toy that helps children explore concepts of size, depth, and spatial awareness in a fun and engaging way.

The set includes 3 wooden cylinders, each with the same radius but varying heights. The cylinders come in three bright colors: red, blue, and yellow. The toy also features a natural wooden block with multiple sides designed for sorting and learning.

On one side of the block, there are 3 shallow holes of equal depth. As the child places each cylinder into the holes, they'll notice the difference in the height of the cylinders, reinforcing the concept of relative size and encouraging sorting by height.

The other side of the block has 3 holes with different depths, perfectly matching the height of each corresponding cylinder. By fitting the cylinders into the correct holes, children can visually and physically explore the concept of depth and negative space, understanding how objects fit into spaces of varying sizes.

The third side of the block features a longitudinal window, through which the child can observe the cylinders inside the holes, highlighting how deep each cylinder goes. This provides an opportunity to discuss the relationship between the visible portion of the cylinder and its depth, further enriching the learning experience.

This simple yet effective toy helps develop fine motor skills, hand-eye coordination, and early spatial reasoning, making it a perfect addition to any Montessori-inspired learning environment.

Rope abacus

42,5 x 12,5 x 8,2 cm

43,5 x 8,5 x 14 cm

38210

In this ingenious toy, the abacus meets the stacking board. Ten rows of colourful rings ordered from the lowest to highest make it easier to teach how to count, while also allowing kids to explore the potential of the classic stacking board, in which the toddler has to put the pieces on bolts.

Blockades at the end of the ropes prevent rings from going astray.

24m+

Stacker 1-5

36,5 x 10,5 x 19 cm

38 x 11 x 19,5 cm

32710

This is a multifunctional educational toy. Its primary function is to introduce children to the concept of counting. The rods are associated with the number below them, making learning easier. You can demonstrate elementary mathematical operations by adding and subtracting the colourful rings. Wheels on the sides add to the stacker an element of additional fun.

NEW!

18m+

1-9 Blocks

- 9 blocks & 45 pegs
- biggest block 18 x 4,8 x 4,8 cm
- 33 x 18 x 6 cm

B1040

This toy is an educational tool that combines play with learning. It helps children naturally develop their understanding of numbers, their magnitudes, and the basics of mathematics.

TOY COMPONENTS

The set consists of nine wooden blocks made from beech wood, shaped as rectangular prisms. Each block has a unique height that is a multiple of the smallest block—representing “one.” The blocks illustrate numbers from 1 to 9, with each block featuring a numerical digit divided into colorful segments. The number of segments corresponds to the value of the digit displayed on the block.

On the sides of the blocks, rows of crystals are embedded. The number and color of the crystals match the number represented on each block. Additionally, the blocks have holes into which pegs can be inserted. The number of pegs corresponds to the value of the number on the block.

PURPOSE OF PLAY

Playing with these blocks allows children to gradually discover the relationships between the various elements of the toy. They naturally learn the concepts of addition and subtraction by understanding these operations through the proportions and differences in the blocks' sizes.

Children also recognize the connections between the number of crystals, pegs, and the graphical symbols of the digits. They observe how the colors of the digit segments correspond to the crystal colors, which helps reinforce these associations.

The toy combines tangible experiences with abstract thinking, supporting the development of logical reasoning and mathematical concepts. Additionally, the sensory aspects of the toy—such as the weight of the wood, the texture of the materials, and the colors and light reflected by the crystals—enhance children's language skills by encouraging them to describe and share their discoveries.

The toy also aids in developing motor skills and spatial imagination. Furthermore, the set's 45 pegs can be used for learning addition and subtraction as the child progresses in their play.

Alphablocks is a set of numbers and letters that are only a few centimeters in size, but thanks to their thinness and proportion give the impression of monumentality. Stacking them up and playing with them feels like moving enormous blocks with the tip of your fingers.

To complement this effect we have designed a linear pattern that highlights the wood grain, and since it is only printed on one side, has the quality of helping children familiarize with the correct orientation of the letters. Finally apart from their function as blocks, children can match the lines in a sort of puzzle and learn the order of the alphabet

This is a game where you pass colourful laces through holes. Children can lace the strings to create different patterns like crosses or dashes. Lacing toys help children develop fine motor skills. Holding, threading and undo-ing are sewing motions that help the hand to train different skills needed for writing.

*Colours will be selected according to availability unless otherwise stated when ordering.

PUZZLES & BLOCS

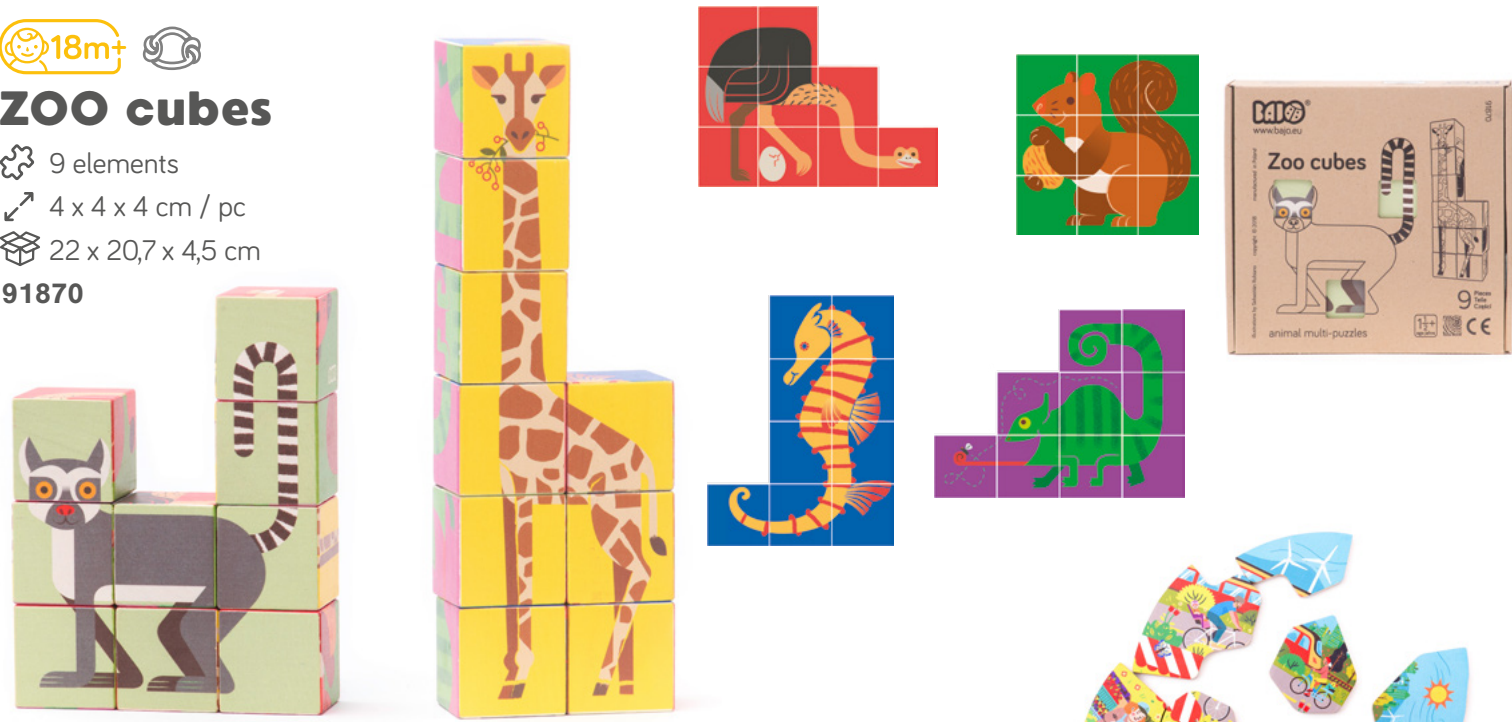

In it's most basic sense, puzzles are matching pieces. You have to connect them so that they reflect the bigger picture. Blocks, on the other hand, are fragments that form models with different degrees of complexity. Blocks can become puzzles when you come up with your own structure and each piece has its own place. In the end the pieces of a puzzle can be use like blocks too. Don't forget, the only rule is to do as you please.

- 36580N** neutral
- 36580P** pink
- 36580SET**

The Kaleidoscope Bajo Set consists of 6 hexagonal blocks, each containing colorful semi transparent pieces, creating mini kaleidoscopes. When placed side by side, these blocks form a beautiful honeycomb pattern! But that's not all—each block also works wonderfully on its own. The compact, pocket-sized design of the kaleidoscopes makes them perfect for city walks or trips to the park. Simply look through the middle to see how colorful and fascinating the world around you can become, with ever-changing, swirling patterns.

Fun fact: A kaleidoscope shows how some insects might see the world—through vibrant, shifting patterns!

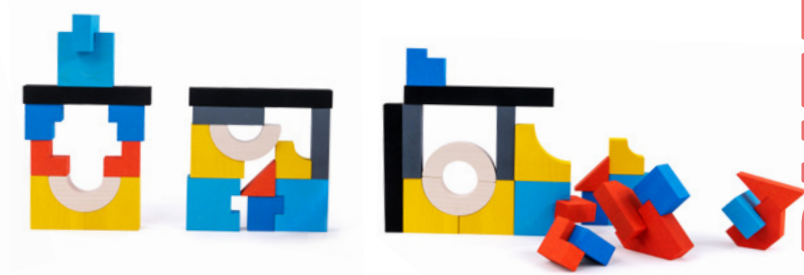

This simple and playful toy offers an engaging visual experience while also sparking curiosity about how we perceive the world.

GAMES

To play the game you have to follow the rules, they can be simple or also complex. You can come up with rules or you can move the figurines in a toy theatre playing roles in any story. You may kick-start whirligigs or marble run, where laws of physics are the rules. Games utilize motoric skills, perceptivity, memory, strategy. Painting, literature, film, theatre, satire, opera, the whole world of art is game reality, only having more complex and mysterious principles.

Memo Fruits & Veggies

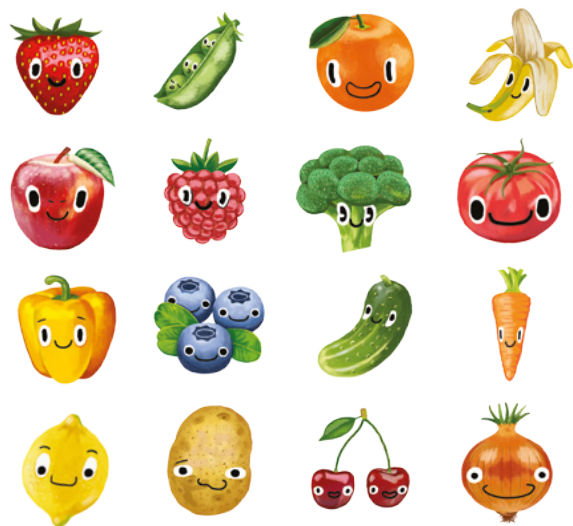

- 32 wooden plates
- 7 x 7 x 1,5 cm
- 16,3 x 11,8 x 15,8 cm
- 99560

We all know how important fruits and veggies are, but getting kids excited about them can be a challenge. That's why we've created a fun and interactive way for children to connect with healthy foods—through a delightful memo game!

This unique memo set features 16 adorable fruit and vegetable characters, all smiling to encourage positive associations with healthy eating. The 32 large, round plates (7 cm radius) are crafted from sturdy beech wood, providing a quality feel as children flip and match the pairs. The plates are larger than usual, making them perfect for little hands to grasp.

As children play, they'll not only have fun, but they'll also develop important memory skills while learning about the benefits of healthy food. This game is ideal for bonding moments with parents, caregivers, or grandparents, making it a wonderful way to promote both learning and family time.

Perfect for introducing healthy eating habits in a playful way, this memo game is sure to become a favorite for everyone in the family!

Sensory Safari

- 10 animals
- 12 x 12 x 0,3 cm
- 31,8 x 15,5 x 4,5 cm
- 99420

Sensory Safari is an interactive sensory game featuring 10 wooden animals and 10 matching cut-out shapes on sturdy boards, along with a fabric bag. This versatile game offers multiple ways to play, whether solo or in a group.

One exciting challenge is to close your eyes and feel inside the bag to find the animal that matches the shape cut-out on the board. It's trickier than it sounds! Another option is sorting the animals into the corresponding cut-out shapes, which helps develop visual-motor coordination. For an additional twist, one player can place a shape in the bag while the other tries to guess the animal by touch alone.

This game encourages the use of both visual and tactile senses, stimulating the sense of touch, imagination, and language development.

Sensory Safari engages both sight and touch, sparking curiosity and excitement as players wonder, "What's in the bag?!" It's an engaging and stimulating game suitable for all ages, making it perfect for quality bonding time between caregivers and children.

Wooden Catapult

21,5 x 11,5 x 13,5 cm

27,5 x 13,3 x 19 cm

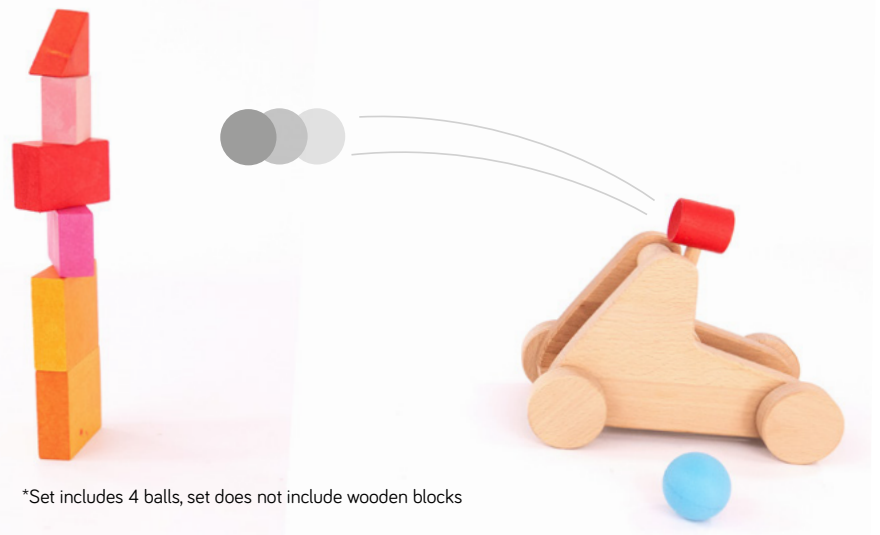

B2090

Unleash your inner engineer with our classic wooden catapult! This simple yet captivating toy uses the potential energy of a rubber band to launch a ping pong ball, offering endless fun while demonstrating the principles of physics in action. The rubber band is easy to replace, ensuring the catapult can keep launching for years to come.

The set includes a ping pong ball that can be aimed and fired to hit a tower of blocks, fall into a box, or any other target the child chooses. It's a fantastic way to spark creativity, fine-tune aim, and explore basic physics concepts like force, energy, and motion.

Catapults, with their simple yet powerful design, have been used for thousands of years. Historically, they were siege engines used in ancient warfare to launch projectiles over walls or at enemy fortifications. While originally designed for battle, these ingenious machines have long fascinated engineers and enthusiasts alike, inspiring this fun and educational toy version.

This wooden catapult is a perfect way to introduce children (and adults!) to the world of ancient engineering and physics, providing an engaging hands-on experience that mixes history with fun!*

*Set includes 4 balls, set does not include wooden blocks

BAIDU®

timeless

For decades we have believed that toys are for everyone, following that principle we have created charming and engaging objects that educate and bring multiple generations together.

Motivated by our journey we decided to create Timeless, a toy line designed to appeal to a wider audience, specially those beyond childhood age. Playfulness knows no limits.

Timeless objects pay great attention to their aesthetic dimension, transcending into meditative pieces.

Beyond entertainment, These toys are also ideal therapeutic tools, they maintain an active and healthy mind as well as help regain coordination and somatic balance to those who have lost them through adverse circumstances.

Timeless objects are truly for everyone.

Ikebana sorter*

11 elements

20 x 20 x 3 cm

31,5 x 15,5 x 4,7 cm

32850

***paper elements not included**

Ikebana is a sorter and magnetic set, where the motor actions are as important as the creative dimension. Children and adults can combine a number of elements and create endless compositions.

Ikebana is an aesthetic experience. It emphasizes the exploration of design principles over preset solutions.

Ikebana is the Japanese art of creating harmonious flower compositions. This tradition inspired us to create a toy set that explores similar principles. The solid wood elements are combined to form a dynamic sculptural composition, emphasizing space, volume, and balance over predefined solutions.

In a changing world with an aging population, we create engaging toys for all ages. Ikebana offers entertainment and education for children while serving as aesthetically pleasing and potentially therapeutic tools for adults. you can also include other toys or materials such as paper or textile.

Wooden Blocks Clock

35 x 25 x 5 cm
28,5 x 26 x 7,5 cm

35830

A wall clock is more than just a device for telling time—it can also be a stunning wall piece and a statement of interior design. This unique clock was designed by a toy company so it brings a playful yet stylish touch to any space.

Perfect for children's rooms, this clock's design celebrates youthful creativity with its colorful blocks on the clock face, reminiscent of the classic wooden toy blocks that have stood the test of time. The vibrant colors and simple yet playful design can be equally appealing to adults who cherish their inner child and enjoy adding a whimsical charm to their home décor.

This clock seamlessly combines functionality with a timeless design, making it a delightful addition to any room—whether for kids or the young at heart.

NEW!

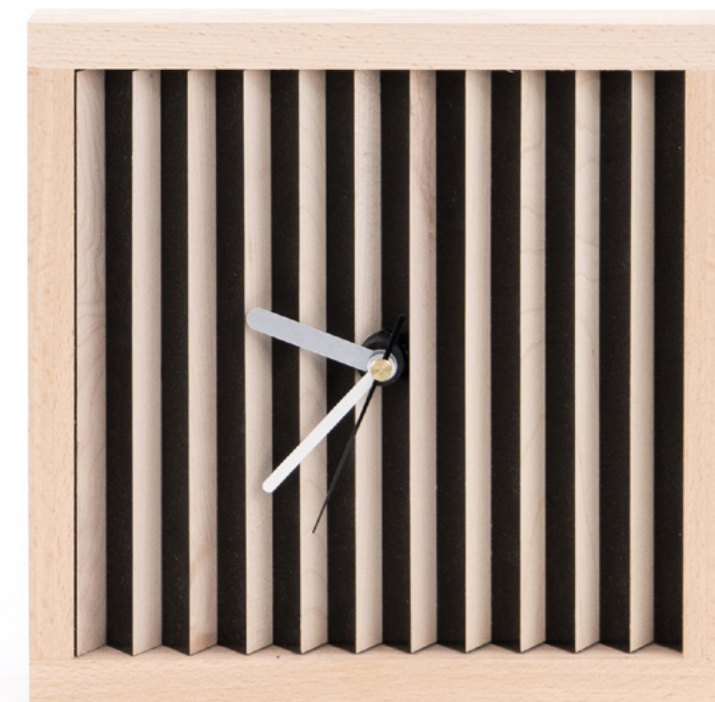

Dawn & Dusk Clock

22 x 22,2 x 4 cm
30,5 x 23,5 x 5,5 cm

35840

Time is marked by the ever-changing transition from light to dark, and this clock brings that natural rhythm to life in a playful, interactive way. Designed with prisms that shift colors depending on your perspective, it offers a dynamic experience—one that doesn't require touch to be engaged with.

As you move across the room, the clock subtly transforms, shifting from deep black to natural light wood, echoing the cycle of day and night. More than just a way to tell time, it is a poetic exploration of movement, perception, and the endless rhythm of time itself.

BAIDU®
 wooden toys

Why are our toys good for the environment?

1 Wood is a renewable resource

Unlike plastic, wood biodegradates quickly and doesn't contaminate the environment. Trees grow back while plastic is just litter.

2 We use leftovers

We use smaller pieces of wood that would otherwise be wasted in other factories.

3 The wood in Bajo toys is environmentally responsible

All our wood comes from companies that respect EU Timber Regulations, so we can be sure they are sustainable plantations not damaging any forests or ecosystems.

4 Basically plastic free

We limit the usage of plastics. We have eliminated them from packaging, and we use cardboard filling to secure shipments.

5 Almost nothing is wasted

We find use for almost every piece of wood. The residues become wood-based raw material for other uses.

6 Wooden toys are natural

Wooden toys are for children a direct connection to the natural world, they improve mental and physical wellbeing.

7 Bajo is socially responsible

Each toy is made in our factory, located in a small Polish town, and its presence has a positive impact on the on the life, and socioeconomic standard of the community.

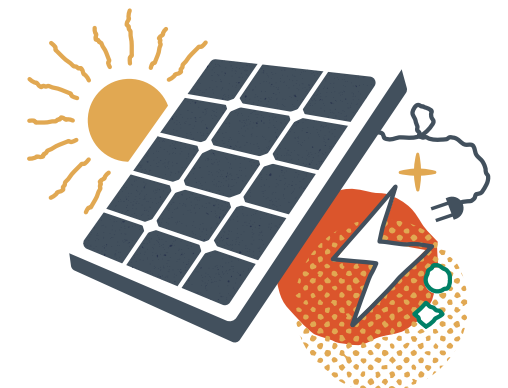

8 Our toys are durable

We create beautiful, timeless and durable toys that can be passed down from generation to generation.

9 We educate in ecology.

Many of our toys are designed to raise awareness about the challenges of the modern world and the "green conscience" or responsibility for the planet.

10 The sun is our power

The sun is an important source of energy in our factory. Every year we install more and more solar panels to power our factory with green energy.
