**Warning!**

Not suitable for children under 36 months due to small parts and risk of choking. Please retain this information for future reference.

## list of components

- (1) base with nest - (a) 1 pc  
and without nest - (b) 2 pc
- (2) base dowels - 3 pcs
- (3) o-rings - 8 pcs
- (4) rails to build ramps - 8 pcs
- (5) clamp rings - 8 pcs
- (6) redirectors - 3 pcs
- (7) balls - 4 pcs

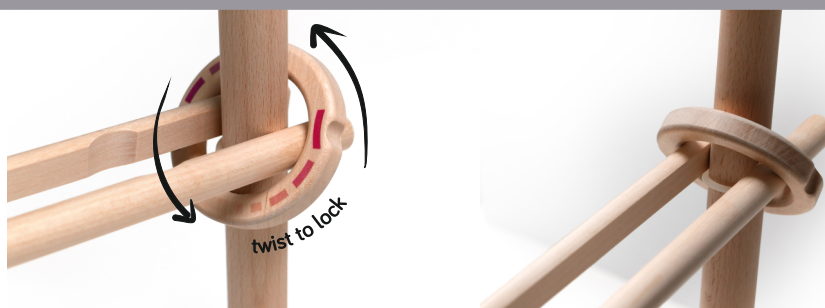

## 1. building towers

Build towers by pressing the base dowel to the base.

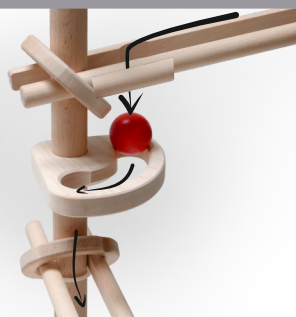

## 2. building ramps

Snap rails to the base dowel with the clamp ring. (By turning the clamp ring you fasten the rails to the base dowel). Rails has to be set in a way to let the ball to fall down to the next lower ramp. ( You may use included o-rings to help building the ramps)

## 3. redirectors

Use redirectors to let the ball to change direction to the next ramp. Redirectors should be assembled under rails.

## 4. playing

Put the ball on the highest point of the highest ramp. The ball should roll - crossing all ramps to the base nest ,down.
